although the united states won the race to the moon the soviets were far more active in space than americans during the decade that followed by the 1980s some space experts feared the united states was in danger of being surpassed in space including dual use systems that might be employed offensively in a military confrontation a few experts looking ahead recommended a space force within roughly two decades standing up space force is organized chronologically by presidential administration beginning in the middle of the clinton years and progressing through the trump administration during the clinton and george w bush years the move to national security space was incremental the obama presidency witnessed the rise of newspace entrepreneurs whose impressive space activities facilitated their initial partnering with u s government national security space nss missions helping the united states keep pace with china and russia during the trump administration all necessary elements finally came together most significantly presidential congressional leadership and bipartisan support to eventually produce the fiscal 2020 national defense authorization act ndaa because the ndaa authorized and provided for the space force when the president signed the defense bill on 20 december 2019 at the same moment he officially established the nation s sixth armed service

rapid prototyping of application specific signal processors presents leading edge research that

focuses on design methodology infrastructure support and scalable architectures developed by the 150 million dollar darpa united states department of defense rassp program the contributions to this edited work include an introductory overview chapter that explains the origin concepts and status of this effort the rassp program is a multi year darpa tri service initiative intended to dramatically improve the process by which complex digital systems particularly embedded signal processors are designed manufactured upgraded and supported this program was originally driven by military applications for signal processing the requirements of military applications for real time signal processing are typically more demanding than those of commercial applications but the time gap between technology employed in advanced military prototypes and commercial products is narrowing rapidly the research on methodologies infrastructure and architectures presented in this book is applicable to commercial signal processing systems that are in design now or will be developed before the end of the decade rapid prototyping of application specific signal processors is a valuable reference for developers of embedded digital systems particularly systems engineers for signal processing systems such as digital tv biomedical image processing systems and telecommunications and for military contractors who are developing signal processing systems this book will also be of interest to managers who are charged with responsibility for creating and maintaining environments and infrastructures for developing large embedded digital systems the chief value for managers will be the defining of methods and processes that reduce development time and cost
